

<b>Title:</b>	<h1>Programming ArcGIS with Java Scripts API</h1>	<b>Why Khagolam:</b> <ul style="list-style-type: none"> <li>• Specialize and Dedicated institute to geospatial technologies</li> <li>• Job oriented curriculum</li> <li>• Comprehensive training material</li> <li>• 100% placement assistance</li> <li>• Professional Trainers</li> <li>• Exposure to live projects</li> <li>• Convenient batch timings</li> <li>• Exposure to 3D GIS</li> <li>• Practice aptitude and interview rounds</li> <li>• Library facility</li> </ul>
<b>Duration &amp; Fees Structure:</b>	<p>40 hours</p> <p>20,000 INR, for resident Nationals of India, Nepal, Bhutan, Bangladesh, Sri Lanka and Maldives, &amp; Myanmar.</p> <p>60 USD, For Non-Residents of India</p> <p>Instalments:</p> <p>5,000 on registration</p> <p>15,000 - before course start</p>	
<b>Category:</b>	<p>Job Oriented Course / Value Addition Course</p>	
<b>Prerequisites:</b>	<ul style="list-style-type: none"> <li>✚ Web portal development experience</li> <li>✚ Should have strong knowledge of JavaScripts, HTML, CSS, DOGO</li> <li>✚ Understanding of GIS concepts</li> <li>✚ Know kind ArcGIS Server Services</li> </ul>	
<b>Who Should Attend?</b>	<ul style="list-style-type: none"> <li>✚ Web developers who want to create java applications that include GIS services and functionality</li> </ul>	

<b>Overview:</b>	<p>This class teaches you how to build highly interactive, visually rich Web and desktop applications using the ArcGIS API for Java Scripts that incorporate ArcGIS Server mapping, geocoding, and geoprocessing services. Also learn how to use the ArcGIS API for Java Scripts and the Java Platform to develop high-performing Web applications that deliver GIS content and functionality to end users.</p>
<b>You will learn:</b>	<p><b>After completing this course you will be able to:</b></p> <ul style="list-style-type: none"> <li>✚ Develop applications using the ArcGIS API for Java Scripts and the Java Platform.</li> <li>✚ Use sample code, sample services, and templates to efficiently build new applications and extend existing applications.</li> <li>✚ Incorporate ArcGIS Server services that allow end users to visualize, query, and edit data.</li> <li>✚ Enhance the display of map features using symbols, MapTips, and renderers.</li> <li>✚ Display task results using graphics.</li> <li>✚ Incorporate GIS operations such as geocoding, geoprocessing, editing, and routing.</li> </ul>
<b>Training Mode:</b>	<ul style="list-style-type: none"> <li>✚ Classroom - Instructor Led</li> <li>✚ Online - Instructor Led</li> </ul>
<b>How to Apply:</b>	<p> <a href="#">Click here to know bank details and step by step registration process.</a>  <a href="#">Register Online</a> </p>
<b>FAQ's:</b>	<p>       Q: Do I need ArcGIS Server installed on my PC?        A: No. You can consume ArcGIS Server services available freely on internet.     </p>
